

impairment(s) meets the requirements of a listing when it satisfies all of the criteria of that listing, including any relevant criteria in the introduction, and meets the duration requirement (see § 404.1509).

(4) Most of the listed impairments are permanent or expected to result in death. For some listings, we state a specific period of time for which your impairment(s) will meet the listing. For all others, the evidence must show that your impairment(s) has lasted or can be expected to last for a continuous period of at least 12 months.

(5) If your impairment(s) does not meet the criteria of a listing, it can medically equal the criteria of a listing. We explain our rules for medical equivalence in § 404.1526. We use the listings only to find that you are disabled or still disabled. If your impairment(s) does not meet or medically equal the criteria of a listing, we may find that you are disabled or still disabled at a later step in the sequential evaluation process.

(d) *Can your impairment(s) meet a listing based only on a diagnosis?* No. Your impairment(s) cannot meet the criteria of a listing based only on a diagnosis. To meet the requirements of a listing, you must have a medically determinable impairment(s) that satisfies all of the criteria in the listing.

(e) *How do we consider your symptoms when we determine whether your impairment(s) meets a listing?* Some listed impairments include symptoms, such as pain, as criteria. Section 404.1529(d)(2) explains how we consider your symptoms when your symptoms are included as criteria in a listing.

[71 FR 10428, Mar. 1, 2006, as amended at 76 FR 19696, Apr. 8, 2011]

§ 404.1526 Medical equivalence.

(a) *What is medical equivalence?* Your impairment(s) is medically equivalent to a listed impairment in appendix 1 if it is at least equal in severity and duration to the criteria of any listed impairment.

(b) *How do we determine medical equivalence?* We can find medical equivalence in three ways.

(1)(i) If you have an impairment that is described in appendix 1, but —

(A) You do not exhibit one or more of the findings specified in the particular listing, or

(B) You exhibit all of the findings, but one or more of the findings is not as severe as specified in the particular listing,

(ii) We will find that your impairment is medically equivalent to that listing if you have other findings related to your impairment that are at least of equal medical significance to the required criteria.

(2) If you have an impairment(s) that is not described in appendix 1, we will compare your findings with those for closely analogous listed impairments. If the findings related to your impairment(s) are at least of equal medical significance to those of a listed impairment, we will find that your impairment(s) is medically equivalent to the analogous listing.

(3) If you have a combination of impairments, no one of which meets a listing (see § 404.1525(c)(3)), we will compare your findings with those for closely analogous listed impairments. If the findings related to your impairments are at least of equal medical significance to those of a listed impairment, we will find that your combination of impairments is medically equivalent to that listing.

(4) Section 404.1529(d)(3) explains how we consider your symptoms, such as pain, when we make findings about medical equivalence.

(c) *What evidence do we consider when we determine if your impairment(s) medically equals a listing?* When we determine if your impairment medically equals a listing, we consider all evidence in your case record about your impairment(s) and its effects on you that is relevant to this finding. We do not consider your vocational factors of age, education, and work experience (see, for example, § 404.1560(c)(1)). We also consider the opinion given by one or more medical or psychological consultants designated by the Commissioner. (See § 404.1616.)

(d) *Who is a designated medical or psychological consultant?* A medical or psychological consultant designated by the Commissioner includes any medical or psychological consultant employed or engaged to make medical

judgments by the Social Security Administration, the Railroad Retirement Board, or a State agency authorized to make disability determinations. A medical consultant must be an acceptable medical source identified in § 404.1513(a)(1) or (a)(3) through (a)(5). A psychological consultant used in cases where there is evidence of a mental impairment must be a qualified psychologist. (See § 404.1616 for limitations on what medical consultants who are not physicians can evaluate and the qualifications we consider necessary for a psychologist to be a consultant.)

(e) *Who is responsible for determining medical equivalence?* In cases where the State agency or other designee of the Commissioner makes the initial or reconsideration disability determination, a State agency medical or psychological consultant or other designee of the Commissioner (see § 404.1616 of this part) has the overall responsibility for determining medical equivalence. For cases in the disability hearing process or otherwise decided by a disability hearing officer, the responsibility for determining medical equivalence rests with either the disability hearing officer or, if the disability hearing officer's reconsideration determination is changed under § 404.918 of this part, with the Associate Commissioner for Disability Programs or his or her delegate. For cases at the administrative law judge or Appeals Council level, the responsibility for deciding medical equivalence rests with the administrative law judge or Appeals Council.

[45 FR 55584, Aug. 20, 1980, as amended at 52 FR 33926, Sept. 9, 1987; 62 FR 38451, July 18, 1997; 65 FR 34957, June 1, 2000; 71 FR 10429, Mar. 1, 2006; 71 FR 16445, Mar. 31, 2006; 71 FR 57415, Sept. 29, 2006; 76 FR 24807, May 3, 2011]

§ 404.1527 Evaluating opinion evidence.

(a) *General.* (1) You can only be found disabled if you are unable to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. See § 404.1505. Your impairment must result from anatomical, physiological, or psychological abnor-

malities which are demonstrable by medically acceptable clinical and laboratory diagnostic techniques. See § 404.1508.

(2) Evidence that you submit or that we obtain may contain medical opinions. Medical opinions are statements from physicians and psychologists or other acceptable medical sources that reflect judgments about the nature and severity of your impairment(s), including your symptoms, diagnosis and prognosis, what you can still do despite impairment(s), and your physical or mental restrictions.

(b) *How we consider medical opinions.* In determining whether you are disabled, we will always consider the medical opinions in your case record together with the rest of the relevant evidence we receive. See § 404.1520b.

(c) *How we weigh medical opinions.* Regardless of its source, we will evaluate every medical opinion we receive. Unless we give a treating source's opinion controlling weight under paragraph (c)(2) of this section, we consider all of the following factors in deciding the weight we give to any medical opinion.

(1) *Examining relationship.* Generally, we give more weight to the opinion of a source who has examined you than to the opinion of a source who has not examined you.

(2) *Treatment relationship.* Generally, we give more weight to opinions from your treating sources, since these sources are likely to be the medical professionals most able to provide a detailed, longitudinal picture of your medical impairment(s) and may bring a unique perspective to the medical evidence that cannot be obtained from the objective medical findings alone or from reports of individual examinations, such as consultative examinations or brief hospitalizations. If we find that a treating source's opinion on the issue(s) of the nature and severity of your impairment(s) is well-supported by medically acceptable clinical and laboratory diagnostic techniques and is not inconsistent with the other substantial evidence in your case record, we will give it controlling weight. When we do not give the treating source's opinion controlling weight, we apply the factors listed in paragraphs (c)(2)(i) and (c)(2)(ii) of this
